**Re: Case No. 9482, In the Matter of the Application of CP Crane LLC for a
Certificate of Public Convenience and Necessity Authorizing the
Modification of the Charles P. Crane Generating Station in Baltimore
County, Maryland – SUPPLEMENT TO APPLICATION**

Dear Ms. Romine:

On May 31, 2018, CP Crane, LLC filed an Application for a Certificate of Public Convenience and Necessity authorizing the modification of the CP Crane Generating Station in Baltimore County, Maryland. The Application included an Environmental Review Document (“ERD”) and Air Construction Permit Application.

The purpose of today’s filing is to correct an error in the netting analysis performed in support of the Air Construction Permit Application, located in Appendix C to the ERD. The netting analysis, which is found in Appendix B *Emissions Calculations and NSR Applicability Analysis* to the Air Construction Permit Application, used various consecutive 24-month periods within the last five years to determine baseline actual emissions for each criteria pollutant. However, in accordance with COMAR 26.11.17.01B(3)(f)(iii), only one consecutive 24-month period should be used to determine baseline actual emissions. Therefore, the analysis has been updated and Appendix B has been revised accordingly. In addition, all affected tables within the ERD (Page 3-19) and the Air Construction Permit Application (Pages 1-3, 3-7, and 3-8) have been revised. These changes are detailed in the attached list of revisions.

Separately, Appendix B *Emissions Calculations and NSR Applicability Analysis* to the Air Construction Permit Application, contains two spreadsheets that have been corrected. In addition, the file containing Appendix B was corrupted when it was previously printed, resulting in missing words and characters within some tables. Although some portions of Appendix B were not affected by this printing error, for ease of replacement, we have included a revised Appendix B to the Air Construction Permit Application. The two corrected spreadsheets are clearly marked.

Terry J. Romine

Page 2

Therefore, enclosed please find an original and seventeen (17) copies of revised pages of the ERD and Air Construction Permit Application, including a complete revised Appendix B. These revised pages should be inserted into the Application. This filing includes: (1) a list of revisions detailing the changes to one page of the ERD and three pages of the Air Construction Permit Application; (2) a clean copy of the four revised pages that should be inserted into the ERD and Air Construction Permit Application; (3) a redline version of the four revised pages showing the changes; and (4) a clean revised copy of Appendix B.

If you have any questions or concerns, please do not hesitate to contact me.

Very truly yours,

A handwritten signature in black ink, appearing to read "F. William DuBois" followed by a small mark that looks like "dmk".
